chainels
THE TENANT APP

Streamline your turnover reporting

Many companies struggle to gather store performance data from their tenants in an efficient and timely manner. Chainels—the tenant experience app—helps property teams transform their way of working, improve their response times and upgrade their workflows.

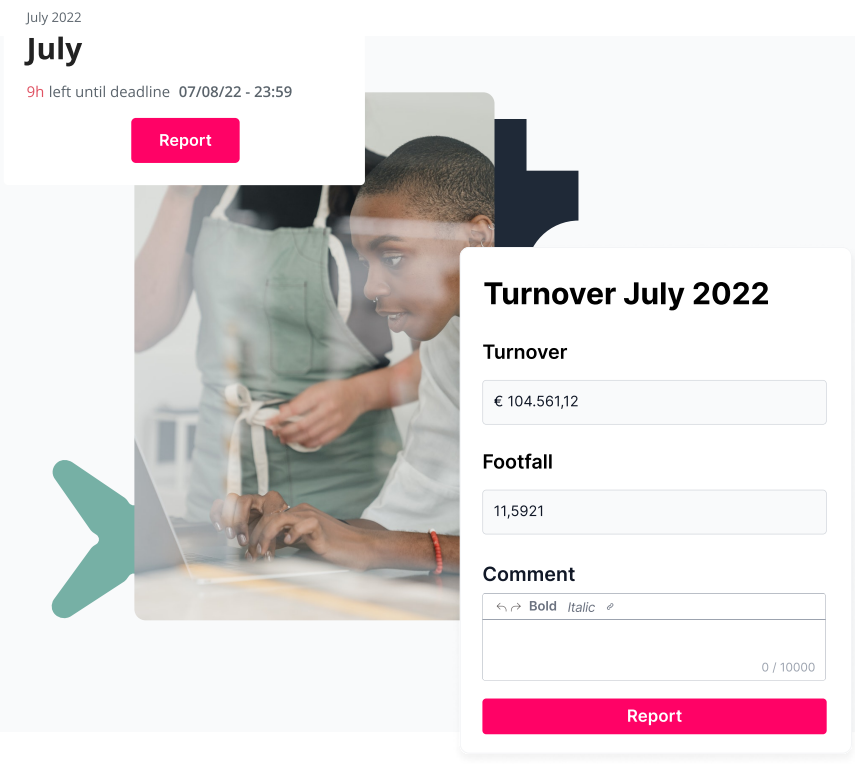
The Problem

- **Turnover reports are an inconsistent jumble of information**
- **Reminding tenants to report their turnover is a part-time job**
- **Copy-pasting and entering data manually, again and again, is tiring**

"Before working with Chainels, we did not have one consistent way of collecting turnover data from tenants. Some provided it on paper others were sending the data by email. The most onerous thing for us was reminding tenants over and over again to finally send in their reports."

- Adrianna Modzelewska, Operations Specialist and Project Manager for Atrium Connect

The Solution



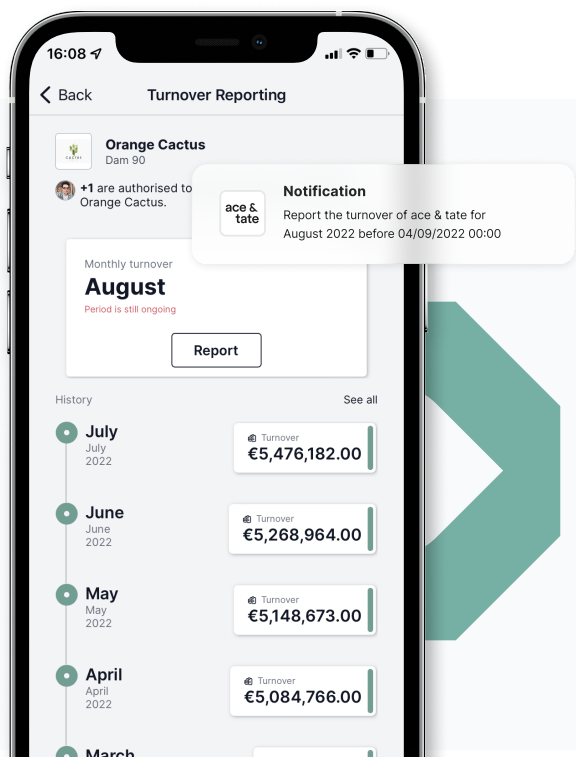
Meet our Turnover Reporting Module

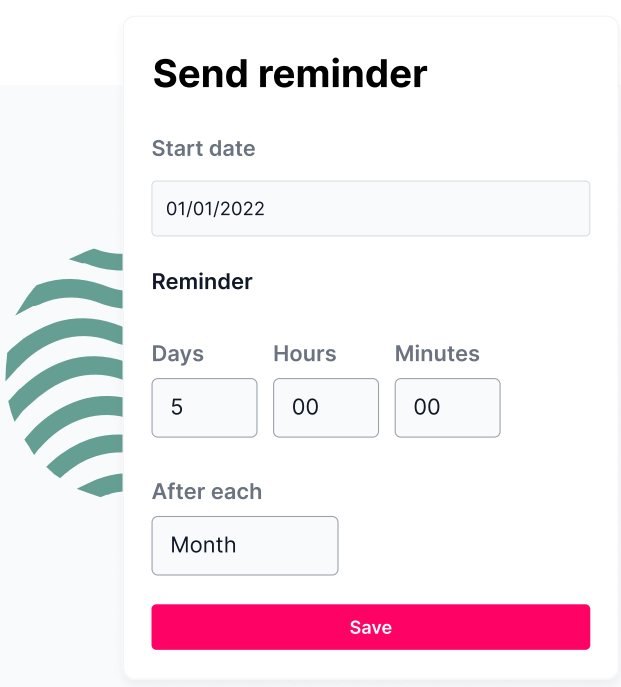
Using a turnover rent model? Get a clearer overview of your commercial tenants' turnover with our complete performance reporting module.

How we solve it

All your data on one platform

Need your tenants to report their data? Send push notifications and email reminders at a frequency that suits you, across your entire portfolio. Receive data from multiple sources on the Chainels app.





Let the reminders do the work

Save time and reduce workload with automatic reminders, configurable by date and time. Schedule them in advance and segment audiences so they're only sent to tenants who haven't submitted their turnover yet.

Reduce reporting headaches with Chainels.

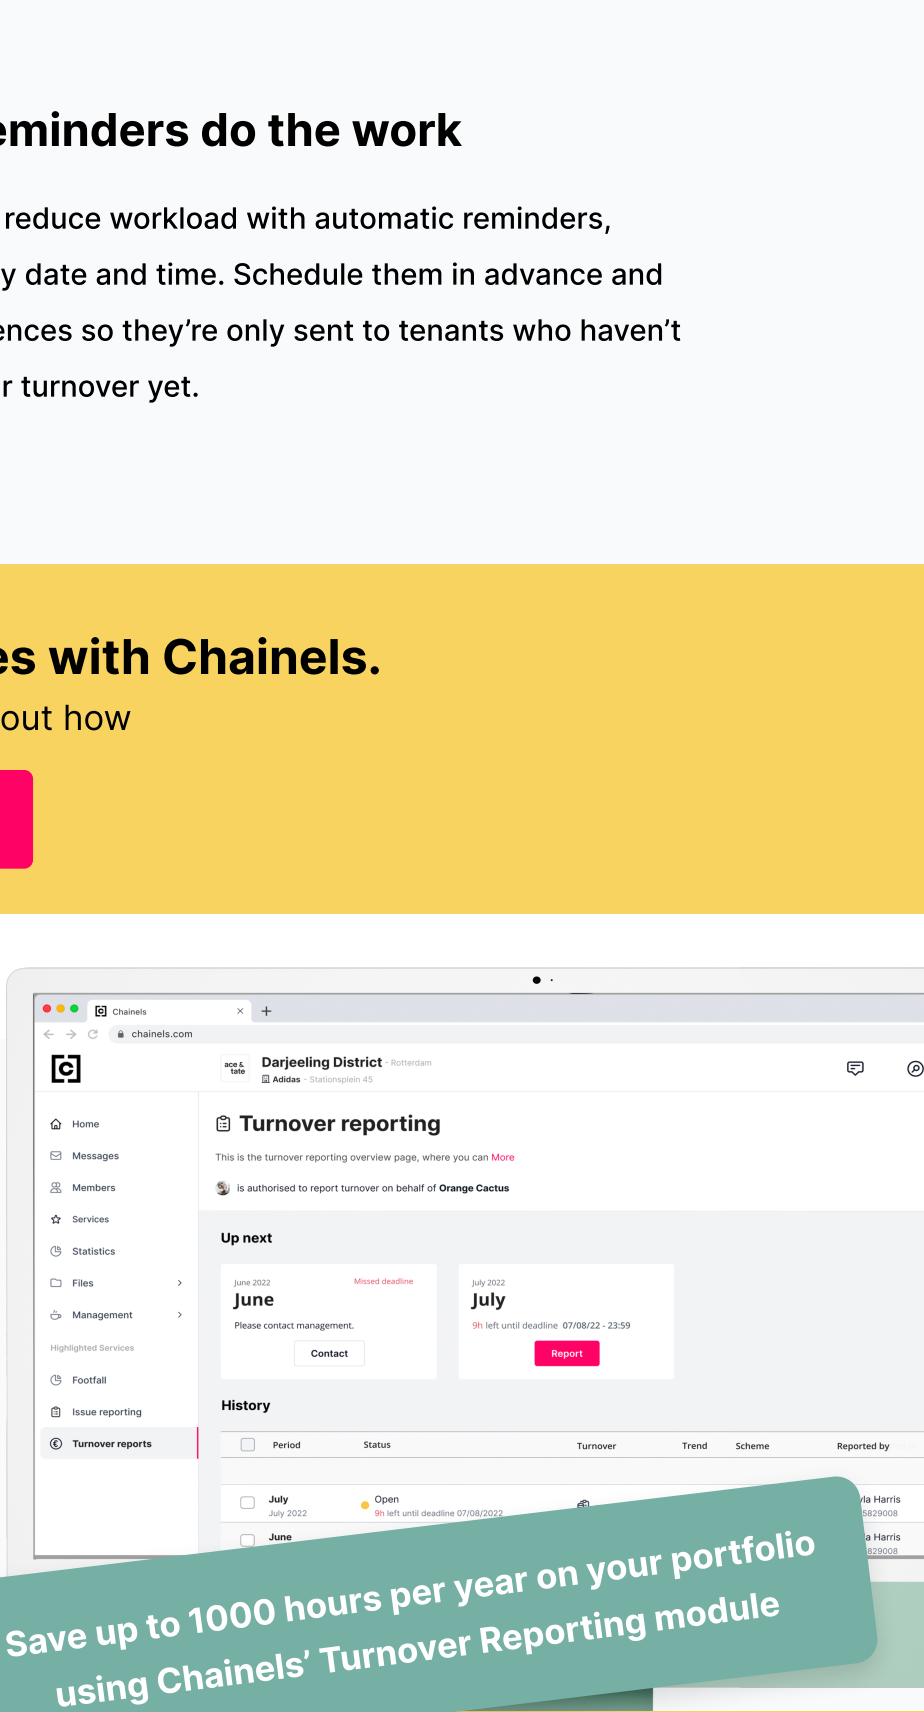
Sync data and analyse trends

The Chainels API lets you pull tenant data into your preferred system, so you can consolidate performance across your portfolio and analyse trends using whichever method you're used to.



Save up to 1000 hours per year on your portfolio using Chainels' Turnover Reporting module

Turnover Reporting is now used by over 80% of Chainels customers with a turnover rent model
